NAME:	Vedant Deshmukh
UID:	2021300025
SUBJECT	DAA
EXPERIM ENT NO:	05
AIM:	Experiment based on greedy approach ,performing fractional Knapsack.
PROBLE M STATEME NT 1:	
ALGORIT HM	Algorithm: Greedy-Fractional-Knapsack (w[1n], p[1n], W) for $i=1$ to n do $x[i]=0$ weight $=0$ for $i=1$ to n if weight $+$ w[i] \leq W then $x[i]=1$ weight $+$ weight $+$ w[i] else $x[i]=(W-weight)/w[i]$ weight $=$ W break return

SOLVED EXAMPL E

PROGRA M:

```
#include<bits/stdc++.h>
using namespace std;
struct Knapsack
{
    int id;
    float prof,wt,ratio;
};
void sort(int n,struct Knapsack arr[10])
{
    struct Knapsack temp;
    int i,j;
    for(i=0;i<n;i++)
    {
}</pre>
```

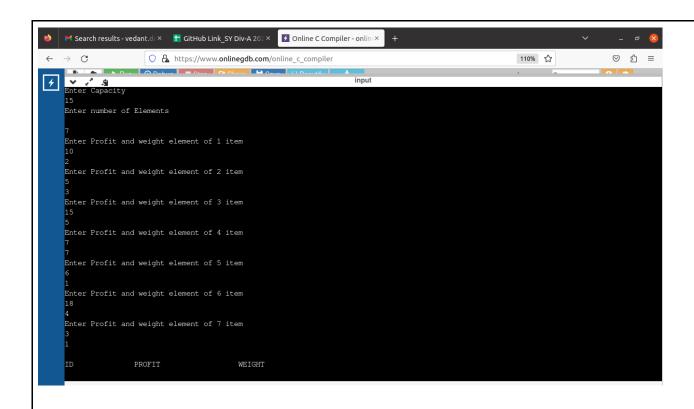

```
for(j=i+1;j<n;j++)
                                              if(arr[j].ratio>arr[i].ratio)
                                                         temp=arr[j];
                                                         arr[j]=arr[i];
                                                         arr[i]=temp;
